

**JABLOTRON ALARMS**  
Guarding your security...

## News Alert - September 2009

### The LD-81 and LD-12 water detectors

The two above-mentioned **water detectors** are for positioning in places where a **possibility of flooding** exists. When water covers the **sensor plates**, the state of the outputs is changed for the **triggering of an alarm message**. The LD-81 is connected to an **Oasis alarm system** via a **JA-81M wireless detector's** wired input for **trigger communication** and **power supply**. It can also be connected to a **JA-60N for Profi systems** with the addition of a resistor. The **12V DC-powered LD-12** is connected to a Jablotron alarm system's **wired input**, with a choice of **two signal wires** according to the switching logic needed (**NO/NC**).

See **more info** via this [LD-81 link](#) and this [LD-12 link](#)

### The JA-83M compact door detector

Available from **mid-September**, this model offers a **conveniently small size (main unit: 75 x 31 x 23 mm)** and the great door detector features that customers have come to expect from Jabloton, including a **3-year battery lifetime**.

See **more info** via this [JA-83M link](#)

### Oasis Training Sessions 2009

Each Oasis training course provides **2 days** of **technical training** for **distributors** and **installers**. Subjects covered include **marketing strategy** and **installation techniques**. The aim is for successful participants to become **certified installers and trainers**. Training is provided **free of charge** and is limited to 12 people per training course. Please contact Jablotron Alarms' Export Sales Department to register yourself. **Dates: September 17-18, October 22-23, November 19-20, December 10-11**

See **more info** via this [Oasis Training link](#)

---

## Public Holiday

**Monday September 28th** is a **public holiday** in the Czech Republic, so Jablotron will be **closed** on that day.
