

News Alert - November 2009

The JA-81F wireless slim keypad

The new-look **JA-81F** is designed to **control and program the system** and has a **slim and compact** physical appearance and a **superior-quality graphical display** and the ability to display customized logos. Also added are **new menu options** and new flip-door **contacts to wake up the keypad** when the lid is pressed without opening for extra ease-of-use. It has a built-in **proximity access card reader** and allows the wiring up of a separate door detector. The **battery-powered keypad** communicates wirelessly using OASiS protocol. An optional external power supply is also available.
